INVENTORY BARCODE GENERATOR

AWARENESS	CONSIDERATION	ONBOARDING	ADOPTION	RETENTION
Enthusiastic Discovery Pragmatic	Efficient Organized Evaluation Hopeful	Creative Setup Relieved	Proud Validated Strategic First Use	Accomplished Trusted Ongoing Use

ACTIONS	ACTIONS	ACTIONS	ACTIONS	ACTIONS
- Discovers Inventory Barcode Generator through Product Hunt while researching new tools for upliance.ai - Shares link in upliance Slack #operations channel — asks team for feedback - Compares with Notion database + barcode plugin (too manual) - Calculates cost: \$39/month vs. 3 lost demo units (₹75,000)	- Signs up for trial, imports existing Google Workspace account — single sign-on - Uploads demo unit inventory: 45 units (cooking devices, review samples) - Creates Asset Categories (Demo) "Review", "Event", "Internal" - Configures check-out workflow with automatic due-date (7 days)	- Generates QR Code labels (preferred for upliance brand — more professional) - Prints labels on 10x150 label printer in office — 24mm labels - Labels demo units during Friday afternoon "labeling party" with team - Revisits demo units during Friday afternoon "labeling party" with team	- Receives first automatic overdue alert — design team has demo unit - Identifies 10 demo units with >50 check-outs — flagging for maintenance refresh - Transfer when moving 5 demo units to Bengaluru office - Volunteers to lead training for new hires	- Monthly "inventory health" review with team — 98% label compliance - Identifies 10 demo units with >50 check-outs — flagging for maintenance refresh - Onboarded 5 new hires — inventory training now part of standard onboarding - Presents upcoming goals: "Zero lost demo units this month"

THOUGHTS	THOUGHTS	THOUGHTS	THOUGHTS	THOUGHTS
"We're losing demo units worth more than a year of this software" "The team will judge me if I pick the wrong tool — I'm 23 months old" "Needs to work with our existing Google Workspace — we're not buying Microsoft"	"No new passwords for the team, they'll lose the code" "Actually, people do use these units — Labeling party was actually fun — team bonding + productivity" "I don't have to chase people manually"	"QR codes look better for our brand — we're a tech company" "Labeling party was actually fun — team bonding + productivity" "Everyone's phone scanned it — no 'it doesn't work on my phone' complaints"	"It saved me a week — previously I tracked these in a spreadsheet" "The overdue alert caught the design team before I had to ask them" "I found some units I forgot about"	"98% compliance — the team has adopted this as 'how we work'" "Highly scalable — proactive maintenance, not reactive failure" "Zero lost demo units this month — first time since I joined upliance"

TOUCHPOINTS	TOUCHPOINTS	TOUCHPOINTS	TOUCHPOINTS	TOUCHPOINTS
Product Hunt • Slack Team Discussion • Competitor Comparison	Google Sign-up • Demo Unit Spreadsheet Upload • Category Configuration	QR Code Generator • Workflow Automation • Label Printer • Team Labeling Session	Check-in Workflow • Device Overdue Alert Notification • Location Tracking	Monthly Team Review • Founder Report Dashboard • Onboarding Integration • All-Hands Presentation

PAIN POINTS	OPPORTUNITIES	PAIN POINTS	OPPORTUNITIES	PAIN POINTS	OPPORTUNITIES	PAIN POINTS	OPPORTUNITIES	PAIN POINTS	OPPORTUNITIES
- Fear of tool selection reflecting priority of feature for tool selection - Team skepticism about "another quick system"	- Early adopter feedback for tool selection - Quick system onboarding with Slack integrations	- Event kit category includes cables and accessories - Labels sometimes stay out of place	- Sub-branding for events and demos - Adding event due dates to labels	- QR codes had no camera permission - Review with teaming glossy matte labels	- Some users didn't scan - Adding event due dates to labels	- Design team felt "watched" by event kit - Event kit didn't have auto-reset	- Event kit didn't have auto-reset - Event kit didn't have auto-reset	- Event kit didn't have auto-reset - Event kit didn't have auto-reset	- Event kit didn't have auto-reset - Event kit didn't have auto-reset

USER JOURNEY MAP: ANDREA BISSONNETTE

Medical Office Administrator | Carleton University | Ottawa, Ontario, Canada

INVENTORY BARCODE GENERATOR

User Journey Maps — Executive Summary

Inventory Barcode Generator | Real LinkedIn Data | May 2026

Four user journey maps trace each persona through 5 stages: Awareness → Consideration → Onboarding → Adoption → Retention
Each map captures Actions, Thoughts, Emotions, Touchpoints, Pain Points, and Opportunities per stage

KOTESWARA RAO DEVARASETTY

Small Business Owner, BSKB Communications

Key Journey:

From Google Search to Sunday-evening freedom — 4-hour manual counts reduced to 30-minute scans

Critical Moment:

First inventory count reveals 12 discrepancies — shock transforms into product advocacy

Emotion Arc:

Skeptical → Relieved → Excited → Triumphant → Confident

Biggest Win:

Reclaims Sunday evenings from inventory drudgery

Biggest Risk:

Data lock-in fear — must emphasize Google Sheets ownership and exportability

INDRAJIT PAUL

MIS Coordinator (P&M), Larsen & Toubro

Key Journey:

From conference curiosity to CapEx approval — pilot proves ROI for division-wide digitalization

Critical Moment:

94% scan compliance in week 1 + 3 ghost assets discovered — validates entire initiative

Emotion Arc:

Intrigued → Stressed → Methodical → Vindicated → Accomplished

Biggest Win:

First-ever CapEx approval backed by real utilization data (not estimates)

Biggest Risk:

Enterprise procurement inertia — needs pre-packaged pilot program with success metrics

SAMRUDHI SUDHAKAR

HR & Operations Manager, upliance.ai

Key Journey:

From Product Hunt discovery to all-hands presentation — zero lost demo units in first month

Critical Moment:

Overdue alert catches design team before awkward confrontation — system becomes ally

Emotion Arc:

Enthusiastic → Efficient → Creative → Validated → Leader

Biggest Win:

Transforms from "tool implementer" to "strategic operations leader" at age 23

Biggest Risk:

Rapid team growth (20→35) breaks onboarding — needs auto-onboarding module

ANDREA BISSONNETTE

Medical Office Administrator, Carleton University

Key Journey:

From conference attendee to conference speaker — zero audit findings for first time in 14-year career

Critical Moment:

Wrong vial scan caught immediately during 312-student flu clinic — potential medical error prevented

Emotion Arc:

Cautious → Patient → Careful → Grateful → Proud

Biggest Win:

Zero findings from Ottawa Public Health — validates patient safety mission

Biggest Risk:

Public sector procurement delays (3-week IT review) — needs expedited health-critical approval path

CROSS-PERSONA JOURNEY INSIGHTS

• 1. EMOTIONAL INFLECTION POINT:

All four personas experience their strongest positive emotion during the ADOPTION stage (first use), not onboarding. This suggests the product "sells itself" once users see real results — but onboarding must be frictionless enough to reach adoption.

• 2. THE "FIRST DISCREPANCY" MOMENT:

Three of four personas (KD, IP, AB) discover inventory discrepancies during their first scan. This is emotionally jarring (shock/alarm) but converts to advocacy when framed as "the system working." Product messaging should prepare users for this.

• 3. GOOGLE SHEETS AS TRUST ANCHOR:

Every persona explicitly mentions Google Sheets integration as a trust signal. For KD it's "no data migration"; for IP it's SAP extract compatibility; for SS it's SSO; for AB it's institutional compliance. Sheets is not just a feature — it's the objection-handler.

• 4. ROLE EVOLUTION PATTERN:

Each persona's journey ends with role elevation: KD becomes strategic decision-maker, IP becomes digital champion, SS becomes leader, AB becomes conference speaker. The product enables professional identity transformation — not just inventory tracking.

• 5. PROCUREMENT FRICTION VARIES:

Decision speed correlates inversely with organization size: KD (1 person) = fast; SS (startup) = medium; IP (enterprise) = slow; AB (public sector) = very slow. Pricing and packaging must match procurement velocity, not just value.
